VOLUNTEERS NEEDED

Help Underserved Families get the Care they Desperately Need!

1 in 10 Californians remain without medical insurance. An even greater number forgo regular vision and dental care, some unable to afford even a simple pair of glasses that will let them see the world clearly.

California CareForce is a group of like-minded volunteers who have come together to do something to combat the inadequate access to healthcare suffered by the most vulnerable in our communities. At 3 day clinics, we provide free dental, vision and medical care to help take people out of pain, give them peace of mind and get them back on the path to better health.

Join us at our upcoming Sacramento Clinic and make a difference. For more details, go to www.californiacareforce.org.
